

# Leah Daniel

## Software Developer

### About Me

While studying and working in Human Resources, I realized that though I enjoyed working in a team and improving processes, the type of challenge I needed was missing. I decided to take the plunge to switch careers and attend Nashville Software School where I could put my knack for logic puzzles to use. I've quickly fallen in love with the feeling of solving a good coding mystery. I am excited to continue the lifelong journey of learning and developing my skills. I bring along a want to help my peers and a strong work ethic to any team.

### Skills

HTML5 | CSS3 | Javascript | React | Git |  
Github | Bootstrap | JSON | npm | VS Code |  
Python | Django | SQL | SQLite

### Individual Projects

#### Trove | Front-end Capstone | [View Code](#)

Trove is an application that allows the user to track all of the media they're using or have in their queue. This enables easy filtering and searching through all media, instead of having to visit many different apps/websites (Steam, Netflix, Goodreads, etc).

Tech used: React, Javascript, JSON, and CSS/Reactstrap.

#### Trove 2.0 | Full-stack Project | [View Code](#)

A new version of Trove, now using both Python and Django REST Framework. In this project, I focused on strengthening my Django ORM knowledge and making my React code more efficient with fewer renders. View the deployed site [here](#).

Tech used: React, Javascript, Python, Django REST Framework, CSS/Reactstrap

### Education

#### Nashville Software School 2022

Certificate- Software Development  
Anticipated Graduation Date - 3/25/2022

#### University of Central Florida 2019

BS in Business Administration  
Graduated Summa Cum Laude - 3.93 GPA  
Burnett Honors College  
Semi-finalist for Capstone team project

### Technical Experience

#### Software Developer 9/21-3/22

##### Nashville Software School

*Intensive full-time, six months software development bootcamp focusing on Python/Django development fundamentals and problem solving. The final three months of the program being executed in a simulated company environment with SCRUM methodology.*

- Daily hands on application of OOP fundamentals through group and individual projects
- Created single page applications in JavaScript, as well as in the React framework
- Project management/tracking with GitHub project boards and issue tracking
- Source code/version control with Git/GitHub
- Solution Design: white-boarding and wireframes
- Leveraged Django for creating and editing server-generated web applications
- Created RESTful API's with Django REST framework
- Retrieved and stored database information with SQLite
- Practiced testing with Python's unit test framework

### Professional Experience

#### HR Assistant 6/18-9/21

##### SpecialtyCare, Aerotek, Wharton-Smith, Aramark

- Facilitated pre-hire and onboarding activities for new hires
- Handled data entry for employee changes
- Streamlined and organized pre-hire procedures, reducing mistakes and processing time
- Authored training guides and SOPs
- Juggled competing deadlines
- Grew relationships with new hires, hiring managers, and teammates
- Ensured compliance with federal laws
- Diagnosed problems with I-9 compliance and initiated I-9 audits
